Dear Neighbor,

**RE: TransGas Limited – Flare Notification
NW 23-20-21 W2M**

Please be advised that TransGas Limited (TransGas), a wholly owned subsidiary of SaskEnergy Incorporated, is planning to complete a scheduled flare at the above location. The flare is in conjunction with upcoming maintenance work taking place in the area.

The flare will be conducted on **Thursday, May 22nd** at the existing TransGas Town Border Station Site at the above location, which is located within the RM of Longlaketon and along the north side of Highway 20, approximately 0.5 kilometers northwest of the Village of Craven. While the infrastructure is isolated from the rest of the system, flaring is required to remove the remaining gas prior to work commencing. Flaring is an industry standard procedure when natural gas needs to be released from a gas line and reduces the carbon footprint of the vented natural gas by 85 per cent. For more information regarding flaring and its purposes, please refer to the SaskEnergy video at the following link [SaskEnergy Spotlight: Natural Gas Flaring](#).

The proposed schedule for the flaring will be from **7:00am to 8:00am** on the above date, which is subject to change based on operating requirements. Please note there will be no interruptions to existing gas services during these activities.

Scheduled work on our facilities and infrastructure supports the safe and reliable delivery of natural gas to all customers. All proposed work is being conducted in accordance with industry best practices and complies with associated provincial regulations.

We appreciate your patience and cooperation with this scheduled work. If you have any questions or concerns regarding the work or the proposed schedule, please contact me at 306-750-3002 or gdaviduk@saskenergy.com.

Sincerely,

Graham Daviduk
Land Consultant – Land Services, SaskEnergy Incorporated
